INTRODUCTION

This is a vacant land inventory of one of the GNRP Areas. It lists vacant land, as defined below, by parcels as they appear in the files of the Boston Assessing Department and as surveyed in the field.

A vacant land parcel is any parcel not containing a permanent structure or any parcel that contains one or more permanent structures, but whose primary use is that of open land, such as a park, playground, parking lot, railway yard or open-storage yard.

This inventory lists assessors' parcel number, lot size, and address. Predominant land use is also listed and it has been determined either by present actual use, or if unused, by the present use of contiguous parcels.

Location maps, currently being prepared by the Graphics Section, are intended to accompany the inventory in order to render a better comprehension of the land resources and their relationships to any given hierarchy of area study.
